Students' success is also influenced by their social and economic background, their prior educational experiences, and the quality of their educational institutions.
- **Faculty development is essential for improving student learning.**  
Faculty who are well-prepared and supported are more likely to create effective learning environments for their students.
- **Institutional change is a complex and challenging process.**  
Institutions that are successful in changing are typically those that have a clear vision for change, a strong leadership team, and a supportive campus culture.

These findings have important implications for policymakers, practitioners, and researchers in the field of higher education.

- **Giroux's theory of critical pedagogy** offers a radical critique of higher education and calls for a more transformative approach to education.
